Psychoinformatics & Neuroinformatics

Week 8
Smartphones

by Tsung-Ren (Tren) Huang 黄從仁

Why bother smartphone development

Most traffic comes from mobile devices

You want your samples to be representative

We carry smartphones everywhere

This allows us to do experience/active sampling

Smartphones have many sensors

This allows us to do passive sampling

Smartphone Penetration Rate

2004 - 2023

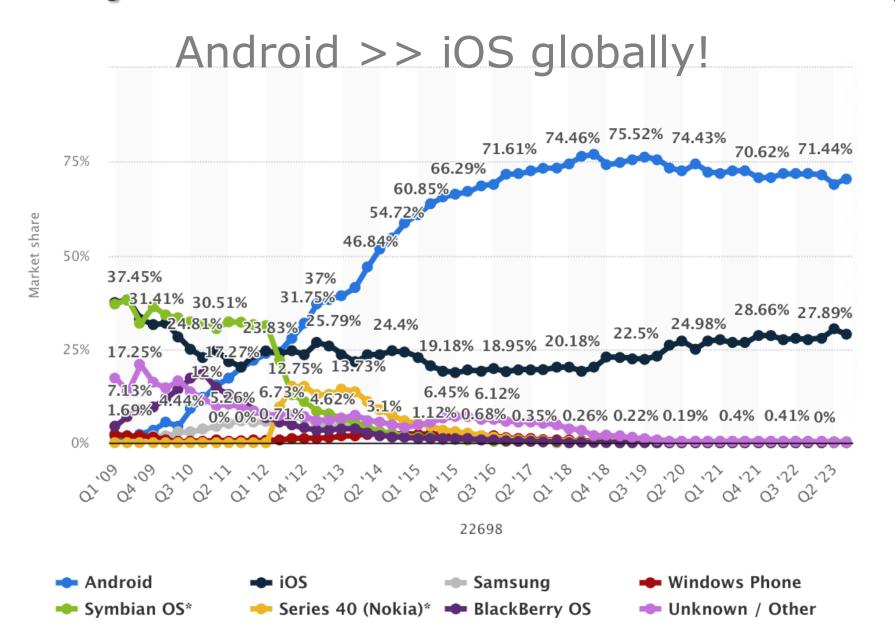

80~90% of Taiwanese are online!

台灣上網率追蹤調查

上網率定義為過去一個月內曾上網

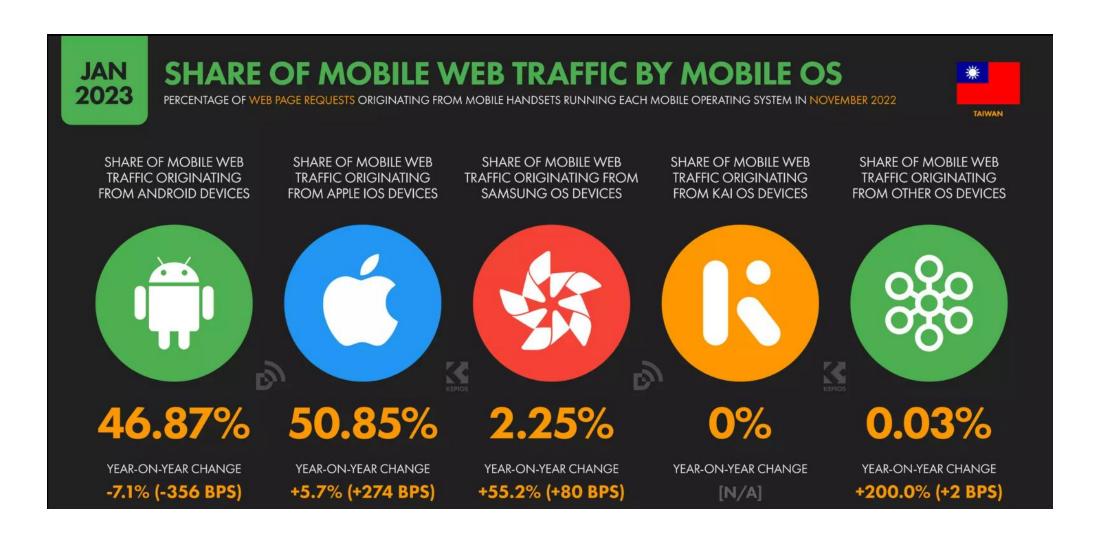

Android/iOS Penetration Rates (1/2)

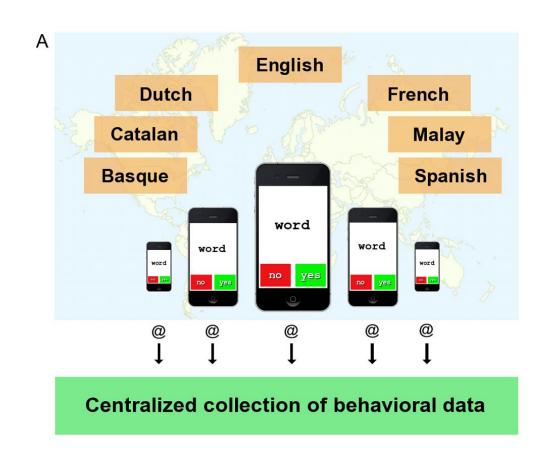

Android/iOS Penetration Rates (2/2)

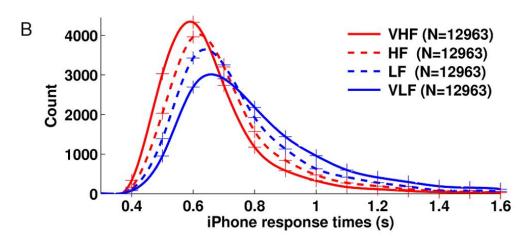

iOS > Android in Taiwan!

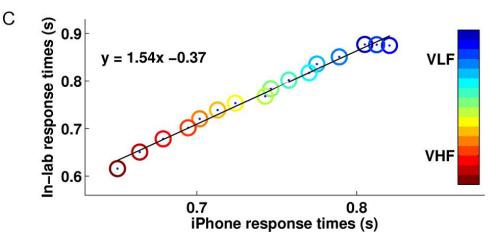

Validity/Reliability of Smartphone Data

Take Lexical Decision Task for an example

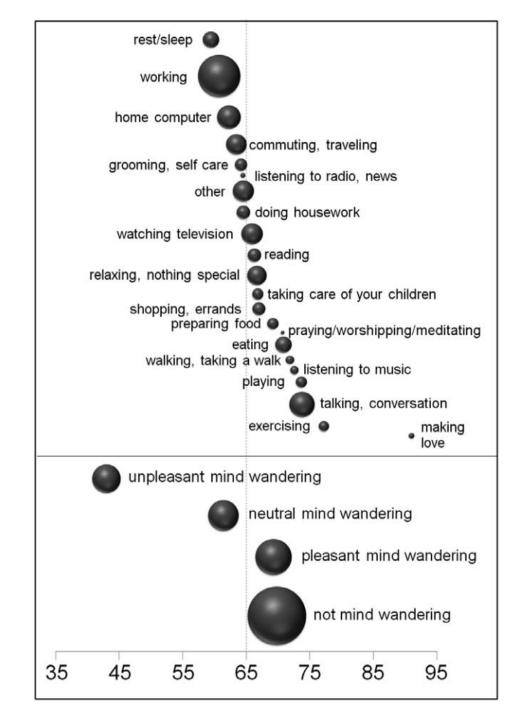

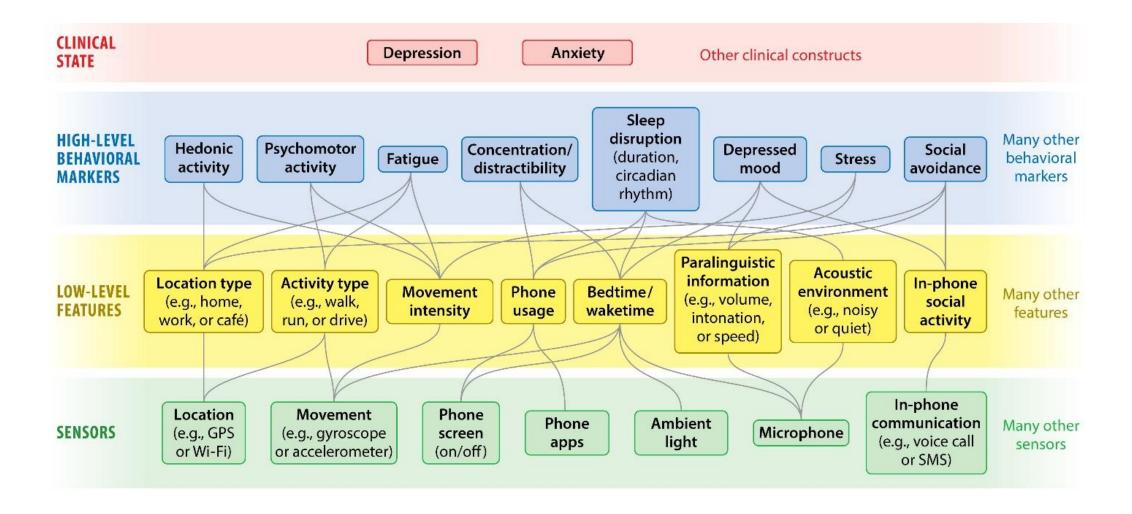

Active/Experience Sampling

Killingsworth & Dilbert, 2010, Science

Passive Sampling: Sensors

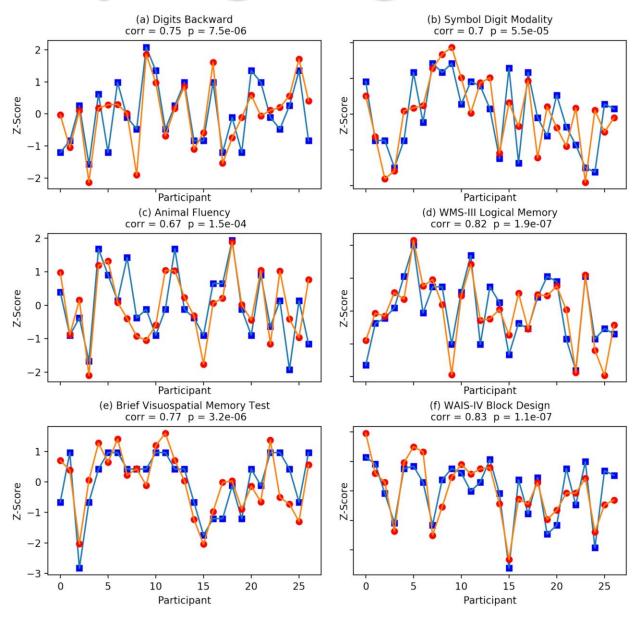

Passive Sampling: Digital Phenotyping

Sample	Year	Location	Duration	Age range	Sample size (N)		Estimated average number (SD) of words spoken per day	
				(years)	Women	Men	Women	Men
1	2004	USA	7 days	18–29	56	56	18,443 (7460)	16,576 (7871)
2	2003	USA	4 days	17-23	42	37	14,297 (6441)	14,060 (9065)
3	2003	Mexico	4 days	17-25	31	20	14,704 (6215)	15,022 (7864)
4	2001	USA	2 days	17-22	47	49	16,177 (7520)	16,569 (9108)
5	2001	USA	10 days	18-26	7	4	15,761 (8985)	24,051 (10,211)
6	1998	USA	4 days	17–23	27	20	16,496 (7914)	12,867 (8343)
					Weighted average		16,215 (7301)	15,669 (8633)

Mehl et al., 2007, *Science*

Passive Sampling: Digital Phenotyping

Developing Apps for Experience Sampling

Or just use LINE or Telegram

Behavior Research Methods https://doi.org/10.3758/s13428-023-02194-2

ESMira: A decentralized open-source application for collecting experience sampling data

Google Play

Games

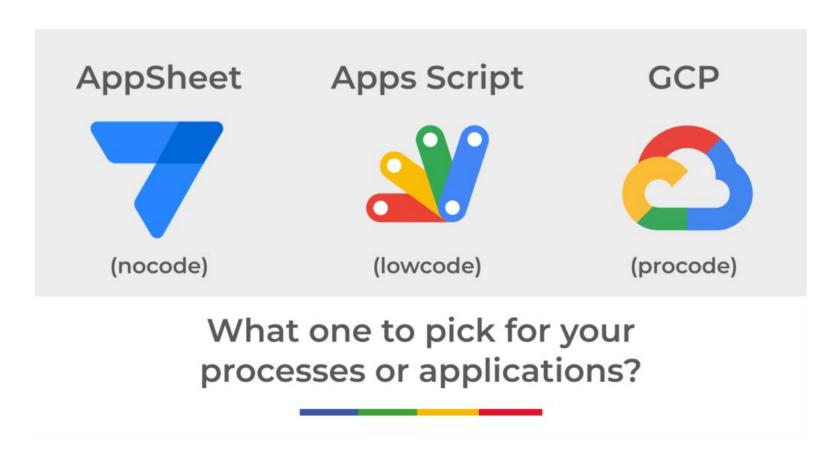

Apps

Accepted: 7 July 2023

Developing General Apps

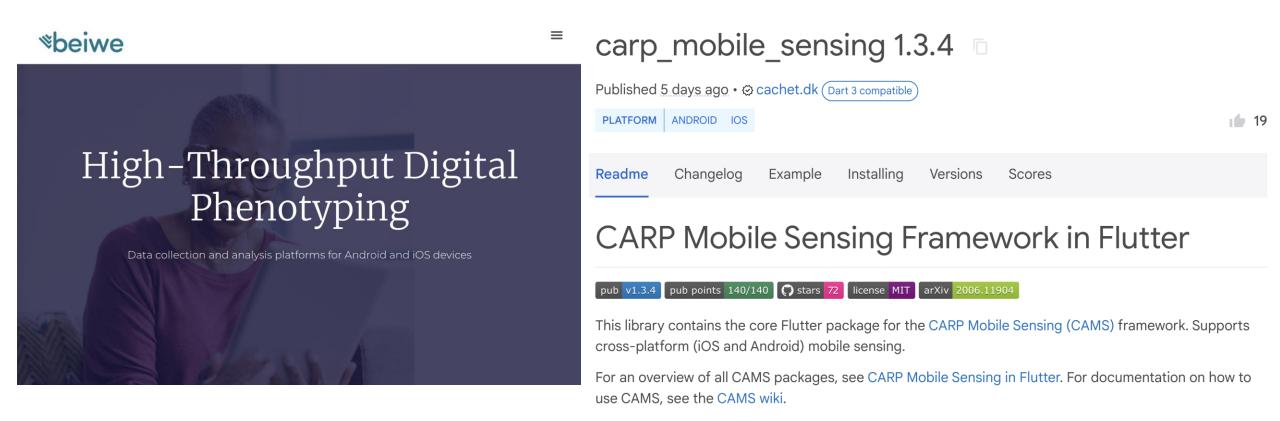

Here are the Google solutions:

Here is a short tutorial for AppSheet.

Developing Apps for Digital Phenotyping

More platforms are developed

Types of Smartphone Apps

Web App: HTML5+CSS3+Javascript+PWA

Hybrid App: Webview+Cordova/Capacitor (Javascript)

Compiled App: React Native (JS) vs. Flutter (Dart)

Native App: Android SDK (Java/Kotlin) + Xcode (Objective C)

Goals for today

Developing Progressive Web Apps (PWA)

Lighthouse, workbox, & pwa-asset-generator

Developing Hybrid Apps Cordova & Capacitor

Developing Compiled Apps
React Native

Goals for today

Developing Progressive Web Apps (PWA)

Lighthouse, workbox, & pwa-asset-generator

Developing Hybrid Apps Cordova & Capacitor

Developing Compiled Apps
React Native

Progressive Web Apps: Better UX

Resource Caching Make pages more reliable with locally-cached

resources

Predictive 'Pre-fetching' faster page load time for page transitions

Offline Browsing/Access

Reliable user experience regardless of network conditions

Web Push Notifications

Notifications keep users engaged with content

Notification

PWA Icon
Installed
A shortcut for
users to instantly
recognize/access
the PWA

SIX REASONS PWAS ARE BECOMING THE APP OF CHOICE:

PWAs Load instantly on any device or browser

PWAs respond quickly to user interaction and queries Mobile Friendly and intuitive; works on ALL devices

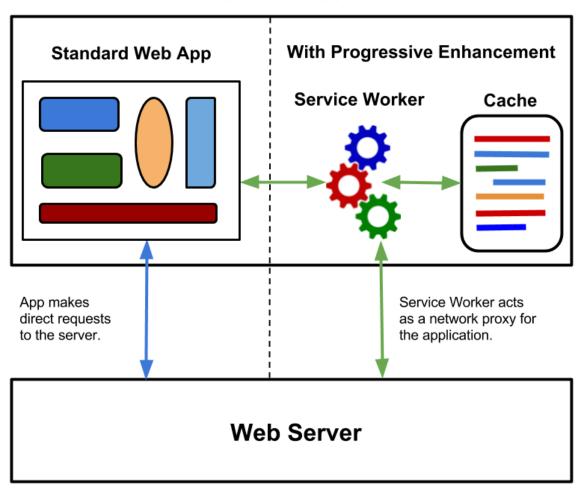

PWAs provide a seamless user experience even during low or no network Allows users to subscribe to useful push notifications

Option is available to add to the end users homescreen

Progressive Web Apps: Mechanisms

Useful tools: lighthouse & workbox

Web Browser

Goals for today

Developing Progressive Web Apps (PWA)
Lighthouse, workbox, & pwa-asset-generator

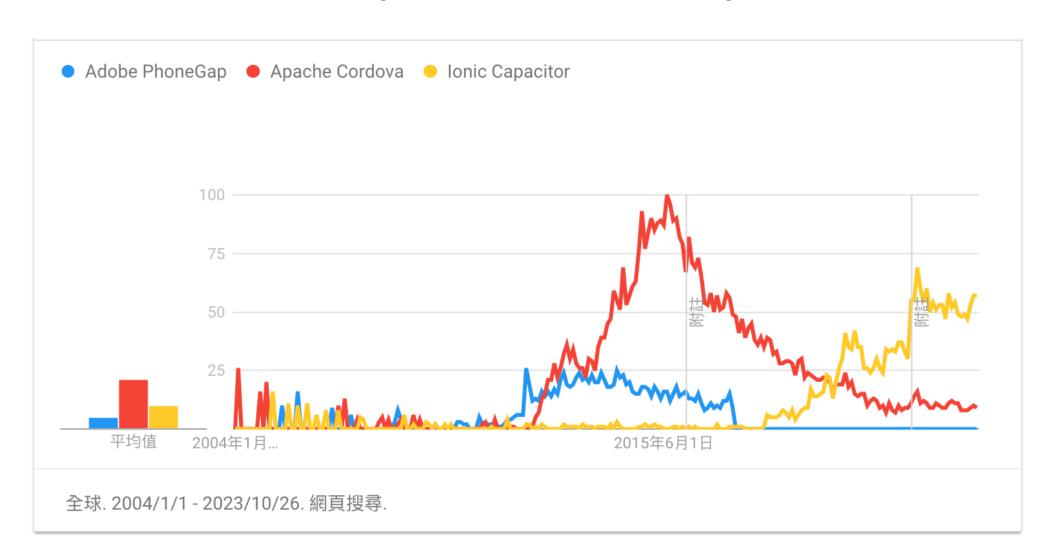

Developing Hybrid Apps Cordova & Capacitor

Developing Compiled Apps React Native

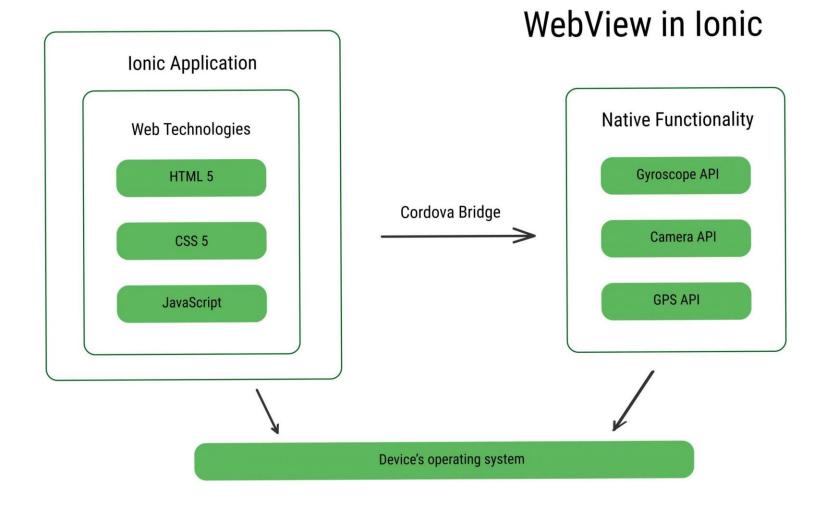

Tools for Developing Hybrid Apps

 $Phone Gap {\longrightarrow} Cordova {\longrightarrow} Capacitor$

Capacitor by Ionic

List of Official Plugins

- · Action Sheet
- · App Launcher
- App
- Background Runner
- Browser
- Camera
- Clipboard
- Cookies
- Device
- Dialog
- Filesystem
- Geolocation
- · Google Maps
- Haptics
- Http
- Keyboard
- Local Notifications
- Motion
- Network
- Preferences
- Push Notifications
- Screen Orientation
- · Screen Reader
- Share
- · Splash Screen
- · Status Bar
- Text Zoom
- Toast
- Watch //

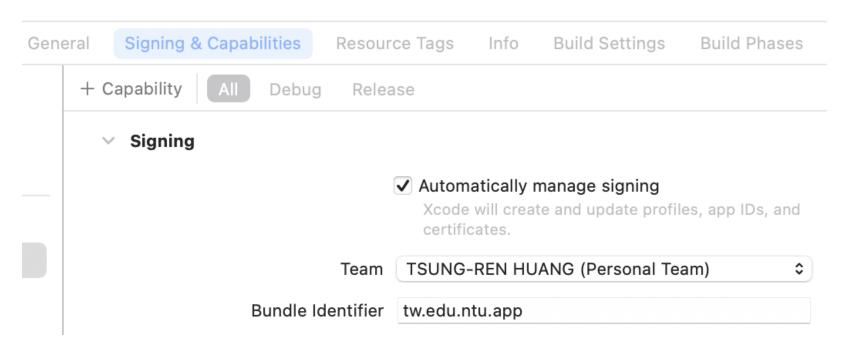

Port Capacitor Apps to Android

You need to install Android Studio first

Port Capacitor Apps to iOS

Besides having a Mac to install XCode...

```
<key>NSPhotoLibraryUsageDescription</key>
<string>Photo Library Access Warning</string>
<key>NSPhotoLibraryAddUsageDescription</key>
<string>This app requires access to the photo library.</string>
<key>NSCameraUsageDescription</key>
<string>Camera Access Warning</string></string>Camera Access Warning</string></string>Camera Access Warning
```

Goals for today

Developing Progressive Web Apps (PWA)
Lighthouse, workbox, & pwa-asset-generator

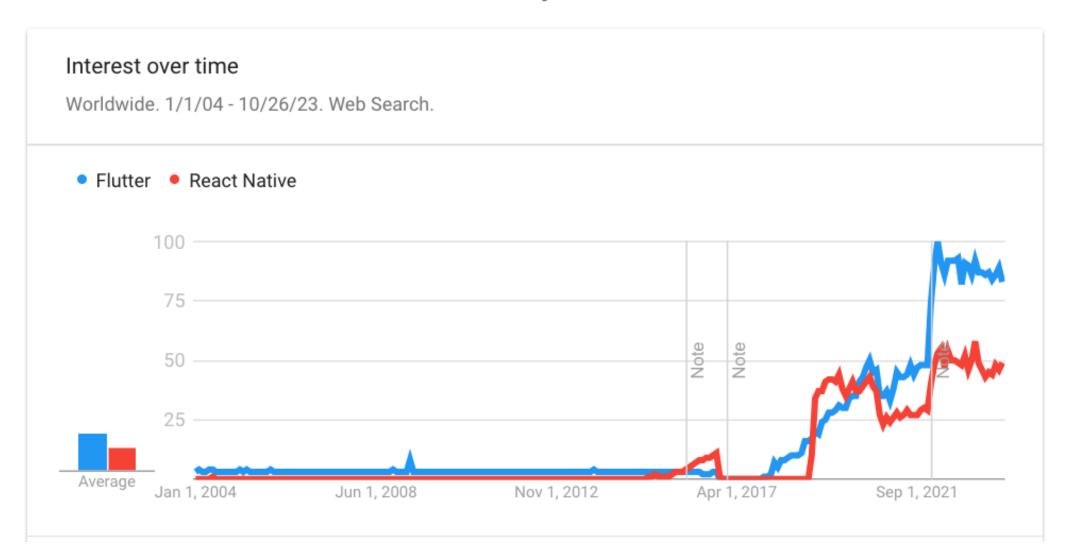

Developing Hybrid Apps Cordova & Capacitor

Developing Compiled Apps
React Native

Tools for Developing Native Apps

Flutter is actually the hotter one

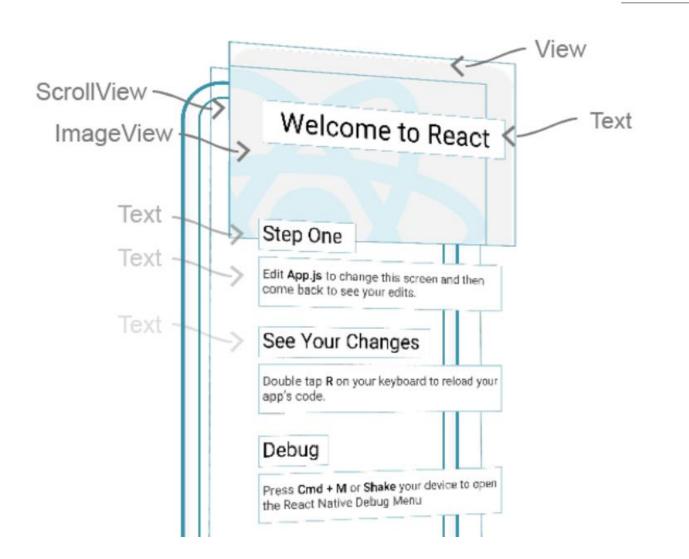

React Native vs. Flutter

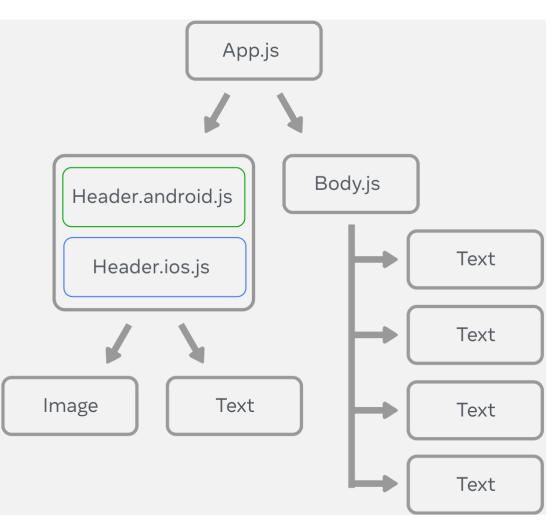

We irrationally choose React Native for edu. purposes

Parameters	React Native	Flutter	
Launch Date	March 2015	May 2017	
Developers	Facebook	Google	
Programming Language	JavaScript	Dart	
Framework Libraries	Third-party libraries	In-built app components	
Native Experience	Good	Superior	
Hot Reload	Good	Superior	
Documentation	Up-to-date but not accurate	Precise and up-to-date	

React Native: Reusable Components

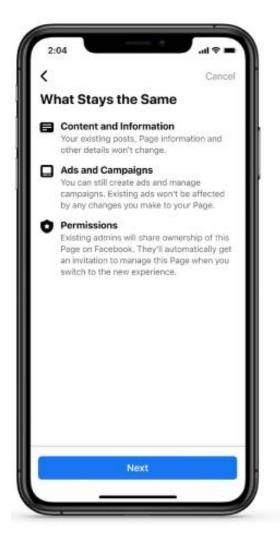

Best tutorial @ Official website

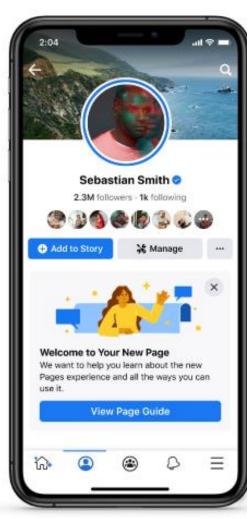

Who uses React Native?

FB & IG eat their own dog food

Summary: Hybrid apps are recommended

Web App: HTML5+CSS3+Javascript+PWA

Hybrid App: Webview+Cordova/Capacitor (Javascript)

Compiled App: React Native (JS) vs. Flutter (Dart)

Native App: Android SDK (Java/Kotlin) + Xcode (Objective C)
